

I urge you to reject petition 04-160. It's important to driver's throughout this nation to have clear consistant information regarding traffic and weather. XM Radio provides this throughout the nation without having to search for a trusted Jockey or station who will give you information which is consistant. We live in an age where the National Association of Broadcasters cannot even control their own stations, why should be give them the power to control XM. Thanks for your time.

Jarod
